Inbox Message List
- **Looks like when open an inbox message, it is changing position and moving to bottom of list. Each message should stay in original position whether opened or not.**Fixed

- **Time/Date Stamp: If from today, then just display time, if from prior to today, then just display date.** Fixed   **Still need to verify when today's messages in system**.
   Fixed

   Steps: Create a new message - > click send button - > select the sent mail list - > check the time.

- **Throughout site, date should use "/" between month/date/year and time should have ":" between hour:miniutes.** Fixed **Time stamp in message header still needs to be adjusted to have ":" intime field.** Fixed

- **Orientation of Refresh button needs to clockwise**. Fixed

- **When Refresh, and screen flips – how will user know when refresh complete – will it keep flipping until completed?** Fixed

Inbox Message
- **Can we make "Details" button small so that it is not emphasis of header? Make smaller or perhaps just a word without the surrounding button.** Fixed

- **When Reply to All, user should still be able to remove someone recipient list.** Fixed
   Still unable to remove a recipient after hit "Reply All" - needs to be fixed.
   Also, when use "Reply" should only be to original sender, not all. Fixed. User can remove the recipient list from directory. In directory selected recipient will be in tick mark and user can unselect the recipient by removing the tick mark.
   Steps: select replay all - > choose directory from To/Cc Field - > see the selected recipient list (remove the tick mark and see the changes)

Send Message

- "**Add Patient Info**" **should remain greyed out to signify that no information is actually entered here – it is only used to open patient info fields.** Fixed
  Still needs adjustment – "Add Patient Info" background should be greyed out as in Design Screens from 9-19-12. Fixed

- **Calendar for DOB – can we pick date other than today? ie: start at June 1, 1970?** Fixed

Touch Base Conversation List
- **The coloring of the Subject and the first line of last message is reversed – Subject should be unbolded black and the message line should be light grey.** Fixed

- **If Last update from today, need time.** Fixed

- **Need " >" next to each conversation like in Inbox to symbolize click to open…** Fixed

Touch Base Messages
- **Need time stamp for each message** Fixed
  Time stamp still missing for each message in thread. Fixed

- Color differentiation – your own posts should be grey, from others should be white
  Coloring is reversed – should be grey for your own, white for from others. Fixed

- **Chronology of posts should be newest on bottom of page. And when open conversation, should be brought to bottom of list (newest post).** Fixed
  Still needs adjustment – when open conversation, should be brought to bottom of message list – last post. Need clarification

- **Can make "Comments" box smaller to save room on screen.** Fixed

- *** Need to Discuss: If multiple recipients, "Read" designation applies if any of the recipients has read? Pending. Its related to the API response.

Directory
- **Layout of profile accessed from Directory should be same as "My Profile" layout.** Fixed

- **Confirm that Status icons only appear if active.** Fixed

- **Coverage icon is wrong.** Fixed

- **Communications preferences – scroll page to see more, not section, so can see more than one line at a time.** Fixed
  Remove within box scrolling – Communication preferences should expand and display to accommodate as much as is entered and use screen scroll to view page if needed. Fixed

- **When send a message from Directory profile, "To" field should be automatically filled in.** Fixed

Other Notes:

- Need to decide what icon/image will be displayed for App icon Pending, waiting for the images from notifyi.

- Settings – need to confirm what default sound will be used. Now we are using the .mp3 file with Tap sound.   **Need clarification.** Fixed.

  Step: login - > select more tab - > Select Mobile Setting - > enable Inbox, Touch base 'sound on message' ON - > minimize the App using iphone Home button click - > re launch the App - > listen the sound. (Nidhi its only for the testing purpose, we have to integrate this functionality with the push notification, when those API's are ready and we can change the sound style)

- **Send message: If user has default signature, should be included at bottom of message being composed and the cursor starts 2 lines above it.** Fixed

- **Discussion Point Auto-log out Options.** Implemented. If the user is idle for 5 minute then log out will happen with alert message.

- **Discussion Point: Force phone passcode lock set option prior to app download??.** Need Clarification
